PRODUCT INFORMATION CERTIFICATE

1. COMMODITY:

Windrowed Straw

Australian Origin

2. COMPOSITION:

Windrowed Straw consists of premium Australian cereal straw harvested and baled directly from field windrows following grain harvest. Common source materials include wheat straw, barley straw, oat straw, and triticale straw.

The product retains its natural fibre characteristics and is suitable for livestock feeding, bedding, composting, and agricultural applications.

3. APPEARANCE:

Trade as sample, or low specs negotiated and agreed.

Typically presented as clean, naturally cured straw baled from windrows with minimal foreign material and natural colour variation depending on crop type and seasonal conditions.

4. SPECIFICATIONS:

Trade as sample, or specifications negotiated and agreed.

Typical quality parameters may include:

- Straw Type
- Moisture Content

- Fibre Quality
- Foreign Material
- Colour
- Dust Content
- Bale Density
- Mould-Free Condition
- Weather Damage Assessment

Unique quality specifications and tolerances may be agreed upon according to customer demand and individual sales contracts.

5. PACKING:

Site 1 (Pyrenees)

1. Big bale approximately 430kgs per bale, loading approximately 25MT per 40ft HQ container.
2. Small bale approximately 27kgs per bale, loading approximately 24MT per 40ft HQ container.

Site 2 (Riverina)

1. Big bale approximately 330kgs per bale, loading approximately 25MT per 40ft HQ container.
 2. Small bale approximately 27kgs per bale, loading approximately 24MT per 40ft HQ container.
-

6. INTENDED USE:

Suitable for:

- Livestock feed rations
 - Animal bedding
 - Feedlot operations
 - Dairy operations
 - Compost production
 - Agricultural and horticultural applications
-

QUALITY & QUARANTINE ASSURANCE

All Windrowed Straw products are handled under strict Australian quality assurance and phytosanitary systems. Products are processed, stored, and loaded using integrated supply chain procedures to ensure consistency, traceability, and export compliance.
